

Cold Brew Tea SOP

Standard Operating Procedure

1. Materials Required

- Premium tea leaves (loose or bags)
- Filtered water
- Glass container (food-grade)
- Strainer or filter cloth
- Thermometer

2. Procedure

Step 1: Preparation

Use 1 part tea to 10 parts cold water ratio. Rinse tea leaves with fresh water if using loose leaf tea.

Step 2: Infusion

Add prepared tea to filtered cold water. Stir gently. Cover container and place in refrigerator.

Step 3: Steeping Time

Steep for 6-12 hours depending on desired strength. Check at 6-hour mark and adjust as needed.

Step 4: Filtration

Strain carefully through fine mesh. Discard tea leaves. Transfer to serving container.

3. Storage & Safety

- Store in sealed glass container at 2-8°C
- Shelf life: 5-7 days
- Keep away from direct sunlight
- Do not mix with other beverages

4. Quality Control

- Inspect tea leaves for debris before use
- Check water quality (neutral pH preferred)
- Verify final color and aroma
- Test temperature before serving (8-12°C optimal)
